Dear Cape Cod Commission,

It's very encouraging to see a renewable energy focus in your energy bulletin! Would it be possible to include links to the incentives and rebates offered by Cape Light Compact and MassSave? I think the links could be a good indication of the Commission's intention to not only mitigate the symptoms of climate crisis but also actively support the reduction of carbon emissions. Also, could links to each town's energy or climate change committee be included in the bulletin?

Thank you for all the work you've done. I look forward to reading more of the RPP.
