Re: Colonial Gas Company d/b/a National Grid construction notification – Sagamore Line Reinforcement Project, Western Segment Phases I and II

Dear Mr. Idman,

Colonial Gas Company d/b/a National Grid will soon begin the construction of the Sagamore Line Reinforcement Project, Western Segment Phases I and II. We anticipate a start date of September 14. To fulfill our commitments, the following actions will be undertaken again by the company to properly re-notify affected properties and community stakeholders:

- Issue to abutters construction notification with visual mitigation program participation form (for direct abutters).
- Run print and digital advertisements in local publications in the coming weeks.

We kindly request publishing the enclosed construction notification on your website to further our community outreach efforts.

As always, National Grid values community input and we welcome any questions. Please feel free to contact me at 781-907-3289 or shannon.baxevanis@nationalgrid.com.

Thank you in advance for your attention to this project. We look forward to your

Sincerely,

A handwritten signature in black ink that reads "Shannon M. Baxevanis".
