Re: National Grid Mid-Cape Main Replacement Project

Dear Mr. Idman,

On behalf of the Town of Yarmouth Planning Department, I have reviewed National Grid's proposed Mid-Cape Main Replacement project for its consistency with the Local Comprehensive Plan and municipal bylaws. The replacement of the high pressure natural gas distribution main is proposed for safety reasons and would allow for service expansions and new connections to the natural gas main in some areas of Yarmouth.

The proposed project complies with the Yarmouth Zoning Bylaws and is consistent with other municipal development bylaws, although some local permitting and permissions will be required. The project will need to be reviewed by the Conservation Commission due to buffer and outer riparian impacts and will require a road opening permit/approvals for construction of utilities within a Town right-of-way. The project is consistent with the goals of the Local Comprehensive Plan and will promote economic development by allowing for natural gas service connections and provide for alternative energy sources.

We look forward to continuing to work closely with National Grid on this important project.

Sincerely,

Kathleen D. Williams, PE  
Town Planner
