

Proposed Fence Alignment “Concept 6”

Provincetown Municipal Airport
Provincetown, MA

Northern Section

Notes:

1. Photos begin at the lease line within the tidal freshwater marsh and proceeds in an easterly direction, concluding near the Sightseeing Shack (see separate Site Walk Orientation Plan for reference).
2. All photos taken March 18, 2010.

Approximate location of proposed fence alignment near fence stake #1202. Vegetation maintenance will be limited to the cutting of Phragmites.

Approximate location of proposed fence alignment near fence stake #1204. Vegetation maintenance will be limited to the cutting of Phragmites.

Approximate location of proposed fence alignment near fence stake #1206. Vegetation maintenance will be limited to the cutting of Phragmites and removal of occasional dead shrubs.

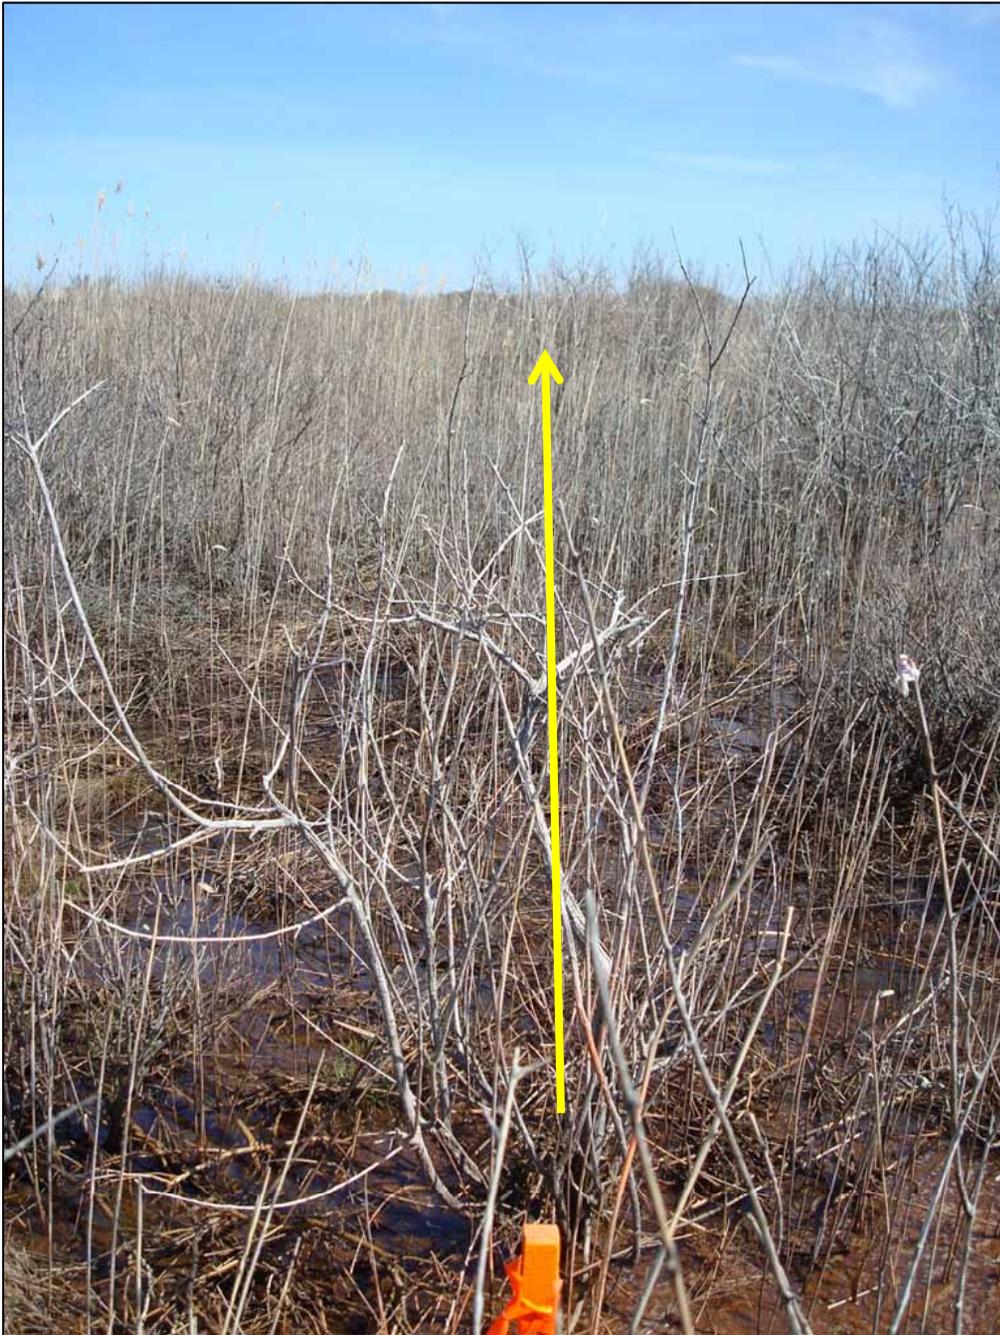

Approximate location of proposed fence alignment near fence stake #1208. Vegetation maintenance will be limited to the cutting of Phragmites and removal of occasional dead or dying shrubs.

Approximate location of proposed fence alignment near fence stake #1211. Vegetation maintenance will be limited to the cutting of occasional shrubs and dead shrubs.

Approximate location of proposed fence alignment near fence stake #1211. Vegetation maintenance will be limited to the cutting of occasional dead shrubs.

Approximate location of proposed fence alignment near fence stake #1212. Vegetation maintenance will be limited to the cutting of occasional dead shrubs.

View of approximate location of proposed fence alignment near fence stake #1214. Vegetation maintenance will consist of the removal and pruning of shrubs.

View of approximate location of proposed fence alignment near fence stake #1216. Vegetation maintenance will consist of the removal and pruning of larger shrubs, where necessary.

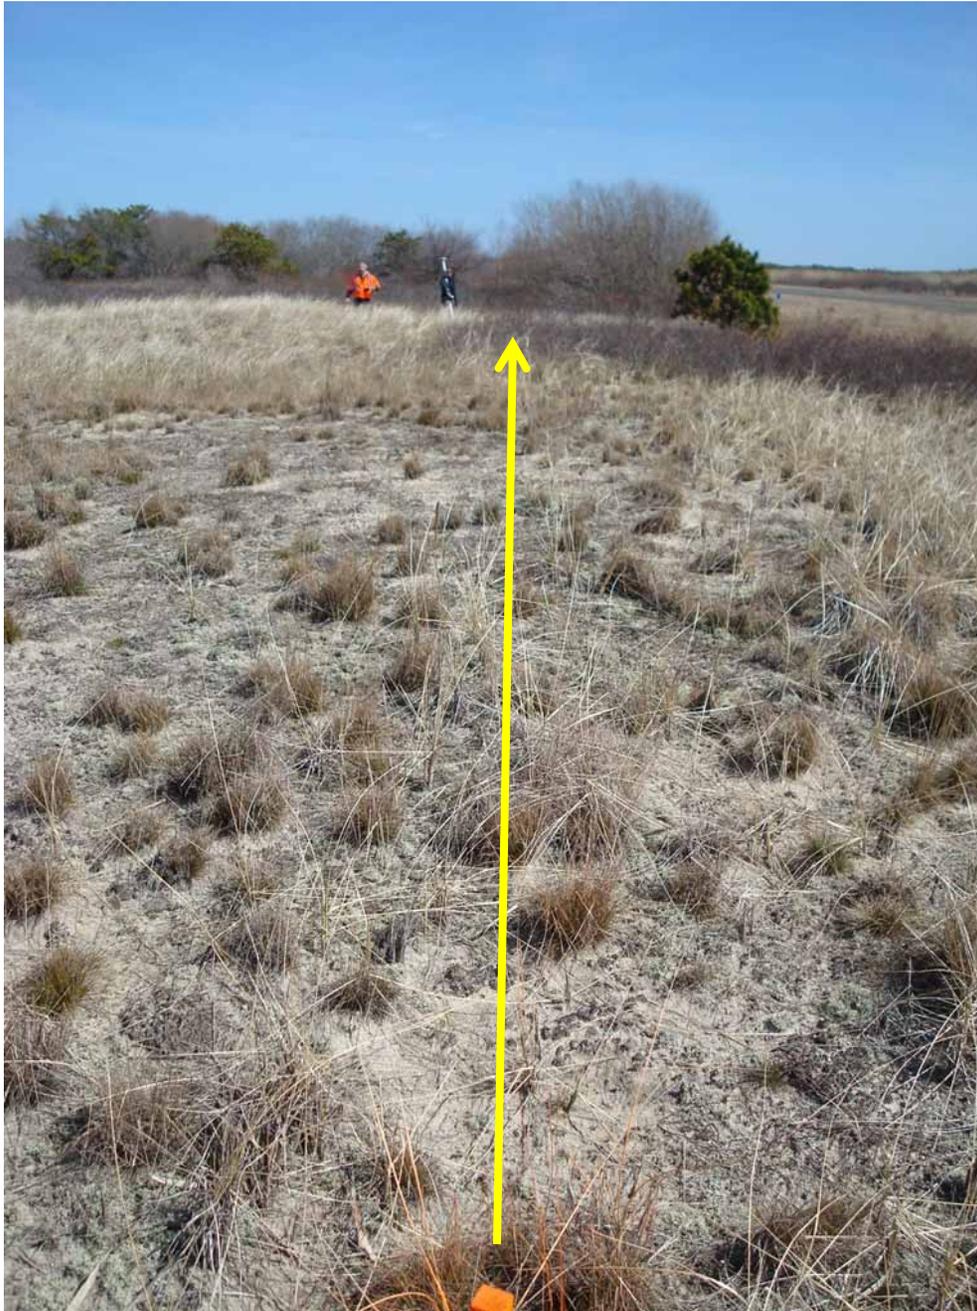

View of approximate location of proposed fence alignment near fence stake #1220. Vegetation maintenance will consist of the removal and pruning of shrubs and pitch pine seedlings, where necessary.

View of approximate location of proposed fence alignment near fence stake #1222. Vegetation maintenance will consist of the removal and pruning of larger shrubs. Shifting the fence alignment to the north 10-15 feet would reduce or eliminate the need for cutting of vegetation.

View of approximate location of proposed fence alignment near fence stake #1224 and #1226. Vegetation maintenance will consist of the removal and pruning of larger shrubs and occasional pitch pine. Shifting the fence alignment to the north 10-15 feet would reduce or eliminate the need for cutting of vegetation.

View of approximate location of proposed fence alignment near fence stake #1227 and #1228. Vegetation maintenance will consist of the removal and pruning of larger shrubs, where necessary.

View of approximate location of proposed fence alignment near fence stake #1228. Vegetation maintenance will consist of the removal and pruning of larger shrubs. Shifting the fence alignment to the north 10-15 feet may reduce or eliminate the need for cutting of vegetation in this area.

View of approximate location of proposed fence alignment near fence stake #1230. Vegetation maintenance will consist of the removal and pruning of shrubs.

View of approximate location of proposed fence alignment near fence stake #1232. Vegetation maintenance will consist of the removal and pruning of shrubs and saplings along the north (left) side of the proposed fence.

View of approximate location of proposed fence alignment near fence stake #1236. Vegetation maintenance will consist of the removal and pruning of shrubs and saplings.

Alternate view of approximate location of proposed fence alignment near fence stake #1236 and #1238 (yellow arrow).
Vegetation maintenance will consist of the removal and pruning of shrubs and saplings.

View of approximate location of proposed fence alignment near fence stake #1147. Vegetation maintenance will consist of the removal and pruning of shrubs and saplings. The vegetation in this photo is representative of the vegetation encountered along the alignment up to stake #1160 at the corner of the G/A Apron.

View of approximate location of proposed fence alignment near fence stake #1160 (note orientation is to the north in this photo). Vegetation maintenance will consist of the removal and pruning of shrubs and saplings along the west (left) side of the proposed fence.

View of approximate location of proposed fence alignment between fence stakes #1162 to #1309 to the rear of the GA Apron. Vegetation maintenance will consist of the removal and pruning of shrubs and saplings along the north (left) side of the proposed fence.

Vegetation along the proposed fence alignment, immediately behind the G/A apron. The fence will run behind the willow shrubs and pruning and selective cutting will be required for fence maintenance. A shift to the north may reduce or eliminate the need for cutting in this location.
