

I am opposed to the proposed Springhill Suites by Marriott in Falmouth.

For several years we the residents of Falmouth have heard reports from Town Committees and Town Departments regarding the limited water supply for the town, the excessive traffic, the polluted estuaries, the need for sewers, the crowded beaches, and so on. These reports indicate that Falmouth is already past the limited capacity of the local ecosystem. The last thing we need is more people, more traffic, and more demands on the environment.

Please reject this proposal by Marriott.

Thank you.
