COMMISSION

Appendix G: Travel Time Records

Cape Cod Commission Traffic Counting Report 2013
Data Collected 2003-2013

CONGESTION MANAGEMENT: TRAVEL TIME RECORDS

One data collection activity conducted by the Cape Cod Commission to measure congestion is the recording of vehicle travel times. During this activity, technicians will travel a pre-determined road corridor and note the length of time between specific checkpoints. The corridor inventory currently includes fifty-six corridors throughout the county. Some of the newly identified corridors may still lack data, and therefore do not have mention in the appendix beyond the reference map (shown on the following page).

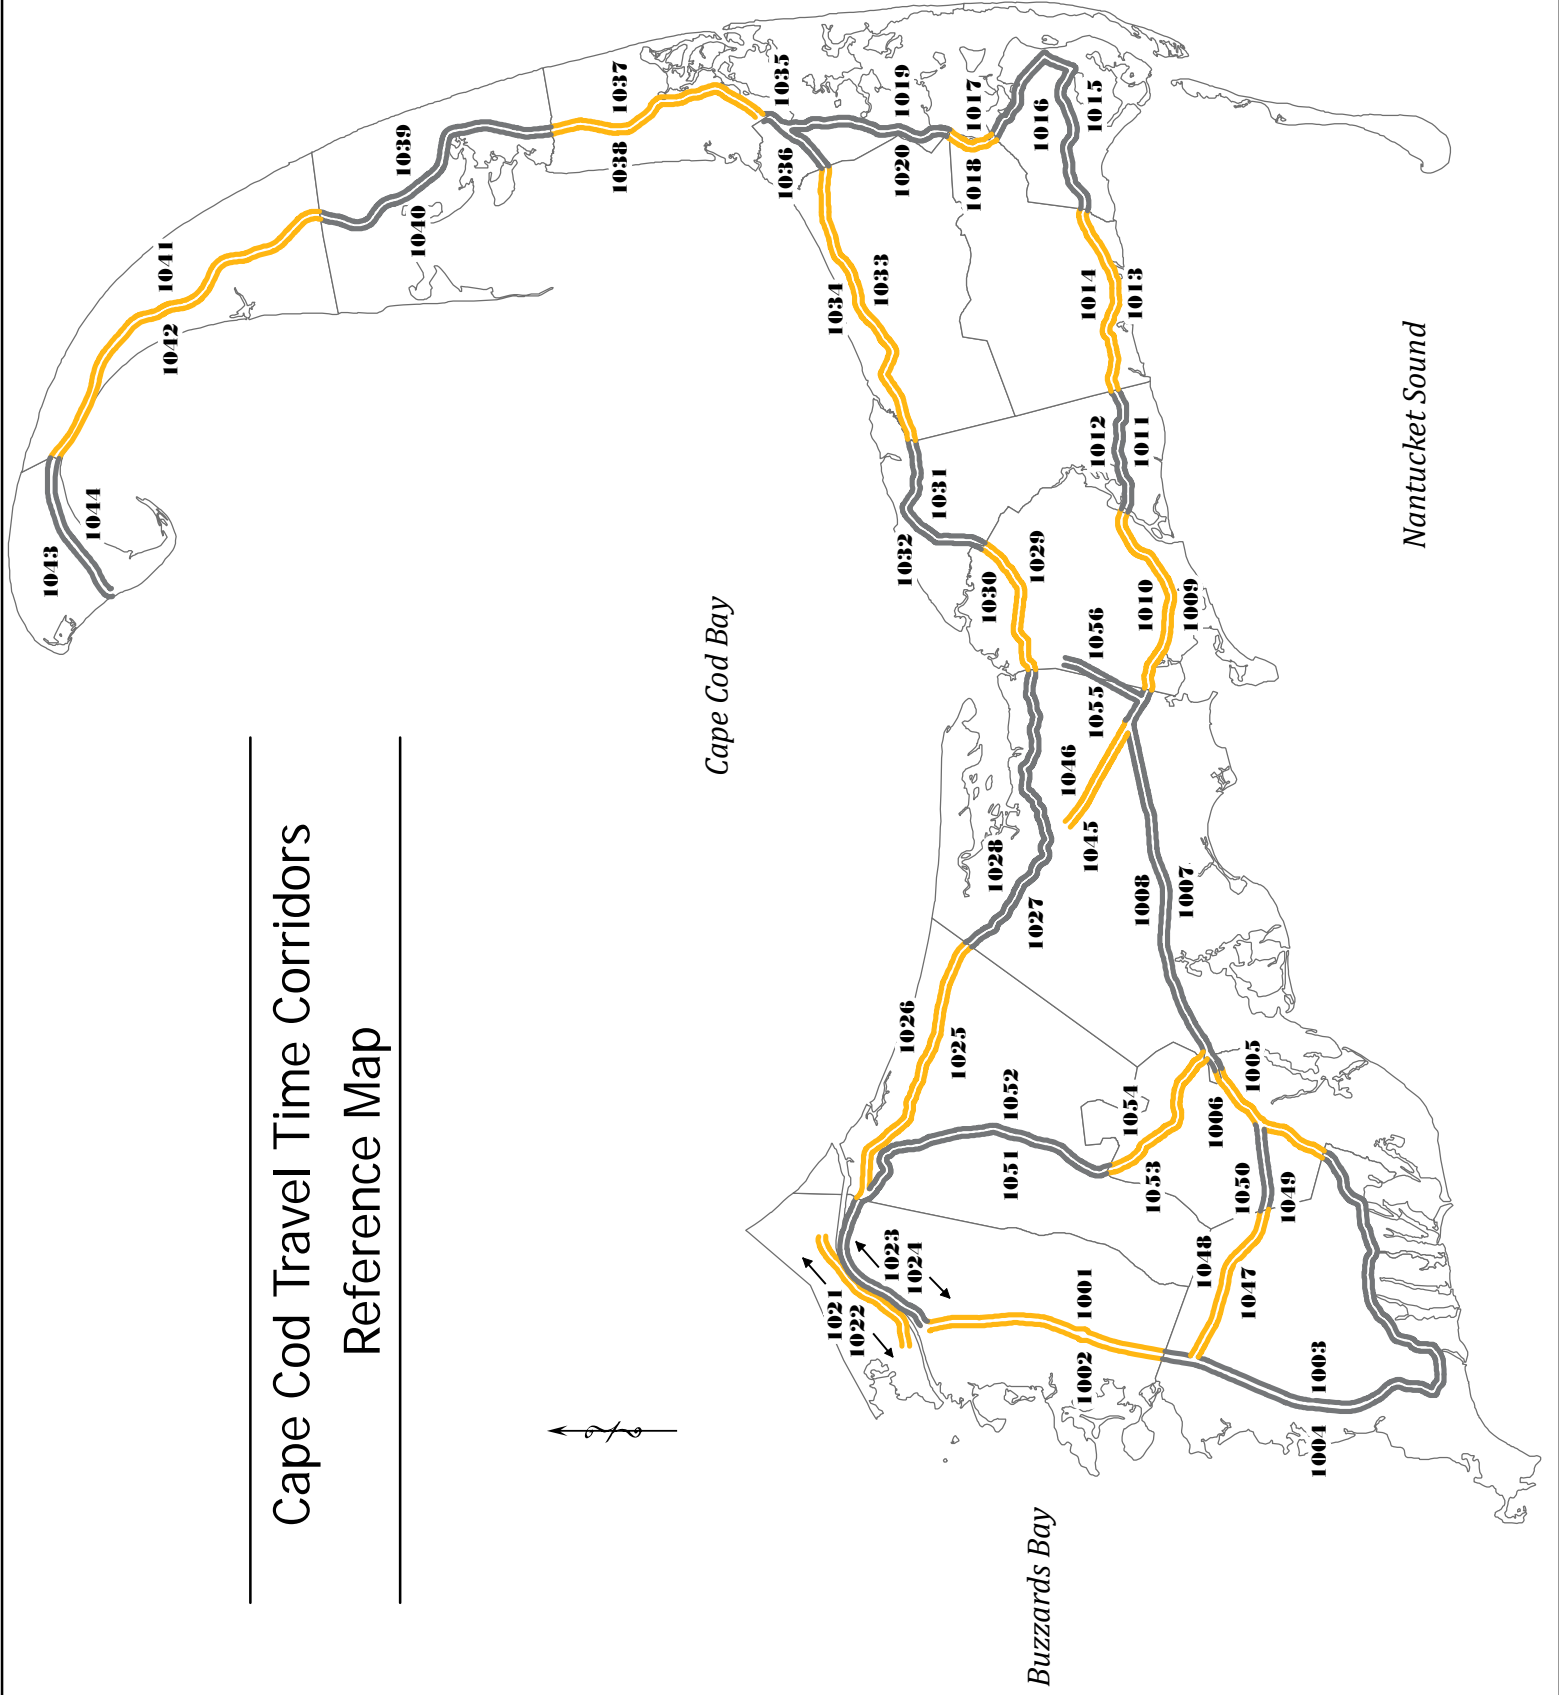

Of the corridors that do contain data, there is a data sheet with historical numbers to correspond with each of these corridors for the years 2003-2013.

At the top of each data sheet, the town, route, corridor number and direction are identified. The average speed for each corridor are shown in yellow for each record completed (starting with most recent in the top left, then moving left to right and down).

Data sheets are ordered by corridor number.

Cape Cod Travel Time Corridors
