TSW-89 — Index observation well to be used for area delineated by dashed line.

WNW-17 — Index observation well location and identification number.

Water level ranges are not shown in wetlands, marshes, and water bodies where the technique described in this report is generally not applicable. Field investigation to determine on-site conditions is needed in these areas for proper evaluation of site suitability for application of technique.

Identification number is the local well number, which consists of a three-character alphanumeric code indicating the town, and a sequential number assigned by the U.S. Geological Survey for wells within that town.
