House Shortage Curbs Science At Woods Hole

The housing shortage remains one of the most acute problems facing Woods Hole scientific institutions. In their annual reports to corporation members this week directors of both institutions cited the need for long range planning which would make provisions for the housing of researchers and students at their centers.

Dr. Charles Packard, director of the Marine Biological Laboratory, told the M. B. L. corporation Tuesday that some laboratory space lies idle because there is no space for seasonal workers to live. Eight lots in the Devil's Lane tract, owned by the M. B. L., have been purchased by members of the corporation, Dr. Packard said in his report. With all lots in the Gansett tract sold, the new development is the only laboratory property which is available to investigators who

want to solve the housing problem by owning their own homes.

Yesterday's meeting of the Oceanographic corporation was told by Director Columbus O.D. Iselin that a long should be erations c lin saw n relief of th ing plans future n Dr. Iselin attended total mer trustees i C. C. Spe bach wer on the placing D R. Taylor Dr. P.]

Chamber Tackles Crisis Of Housing Shortage

By LAURA M RECKFORD
Residents who have noticed longer lines at shops this summer or poor service at restaurants may not realize that these are symptoms of a regional housing crisis on Cape Cod.
"Without the service piece, the whole thing collapses," said Robert Murray of the Falmouth Housing Authority, citing the lack of housing for service personnel at the heart of the region's economy.
With business owners struggling to find employee housing and voicing fears of economic impact, the Cape Cod Chamber of Commerce has decided to step in to solve housing problems.

"Businesses are impacted when their employees or potential employees can't find housing," said John D. O'Brien, president of the Cape chamber.
Mr. O'Brien chairs the new Cape Cod Chamber of Commerce subcommittee that was formed last month and includes housing experts, as well as business leaders in retail, tourism, banking, and high tech industries.

Mr. O'Brien said the committee was formed after a chamber board work session when mem-

Falmouth Enterprise, 1999

the banking community become involved in housing issues.

"More affordable housing is in everyone's interest," said Mr. Murray.

Kelley Pratt, executive director of the Falmouth Chamber of Commerce, said the Falmouth chamber's tourism committee and the board of directors have had a lot of discussions about problems finding seasonal housing for employees. "We are starting to explore some options for next year," said Ms. Pratt.

Mr. O'Brien did not want the Cape Cod Chamber's committee to duplicate work performed by existing agencies in the region like Falmouth Housing Authority, Housing Assistance Corporation of Hyannis, and Barnstable Housing Authority. But Mr. O'Brien thinks the chamber is in a unique position to help housing advocates because of board members' financial connections.

The committee will approach "members of the Cape's business community to find resources, advice, and support for projects, which are meritorious and capable of receiving rapid development approval," the mission statement continued.

Housing Crisis Changing Cape

HYANNIS, Mass. (AP) — Chris Krzyzek considers his family, and workers like them, part of Cape Cod's "Rubber Boot Gang."

Krzyzek is a mechanic, like his father. One brother builds homes. Another builds boats. Since they moved to Pocasset 32 years ago, blue collar trades have helped his family earn a living, and make Cape Cod their home.

But Krzyzek, 40, worries that the Rubber Boot Gang might not have a home on the Cape much

SUV, minivan or Mercedes among us. We have become strangers in our own land."

As hospitable as the Cape is to summer tourists who flock to its famous beaches, longtime residents looking for affordable housing are finding it hard to place.

A six-month review of the Cape's affordable housing crisis by the Cape Cod Times shows a region undergoing a fundamental change in character.

Its traditional workers — artists, cooks, marine scientists — are quietly leaving for cheaper housing. The resulting labor shortage is so severe that schools and medical facilities can't fill positions. Some business owners are forced to provide subsidized housing in order to find enough help.

"It's not just seasonal workers," said Kevin Howard, chairman of the board of the Cape Cod Chamber of Commerce. "We're talking year-round, middle-management jobs. These people can't find housing of any kind that they can afford."

A wealth of statistics illustrate the problem, the Times reported.

—The median price of a home on the Cape is \$182,000, up 17.1 percent in a single year for the period ending June 30. That ranks the Cape seventh in the nation for home appreciation.

—Since 1995, median home prices have risen 62 percent on the Cape, while wages have gone up 20 percent. Nationally, median home prices are up 20 percent, while wages have risen 25 percent.

—Cape Cod is the 13th least affordable place to live in the country, according to the National Association of Home Builders.

—At the average Cape Cod family income of \$47,700, only 30 percent of families can afford

a home in the current market, according to the National Association of Home builder's "housing opportunity index."

The Cape's problems reflect a nationwide housing crunch. The strong economy has fueled a housing boom that has driven rents and home prices up at higher prices. But the problem is exacerbated on the Cape, which is known for a high quality of life.

"This is not complicated," said Kevin Joyce, president of Cape Cod & Islands Mortgage in Orleans. "The Cape is so desirable. There are a lot of buyers with a lot of money and not much stock."

The tony island of Nantucket offers a stark illustration of the effects of the crisis. With the median home price at \$815,000, the island struggles to keep school administrators from bolting, recently offering its curriculum director a 20 percent raise just to keep her for another year.

On the mainland, Outer Cape Health Services, is having trouble hiring staff because of the high cost of living, according to executive director Scott Penn.

"Our first concern is for our front-line staff," he said. "But it is starting to affect our ability to hire doctors. That's a whole new level of concern and it's very frightening."

Perhaps most affected are workers such as Lisa Sullivan. The only place she could afford on the \$9 per hour she made working with handicapped people was an illegal apartment in a dank Hyannis basement.

But when the house was sold, she was out of options. As of early September, she and her 12-year-old son had left the Cape to live with her sister in Middleboro.

"I'm going to live with her until I find a place," she said.

Athol Daily News, 2000

Coastal scientists struggle to find affordable housing on the Cape

Associated Press
PROVINCETOWN — Cape Cod's housing crisis has reached the ivory tower:

Scientists working the Cape's coastal research centers can't afford homes and rents, and institutions are feeling the pinch, particularly the smaller centers.

"It certainly limits our options," Peter Borrelli, executive director at the Center for Coastal Studies, told the Cape Cod Times. "It's difficult to get the quality of people we want because of our pay scale."

Borrelli recalled a young scientist the center lost because he couldn't afford a home, and didn't want to commute.

Moir Brown, a senior scientist at the center, eventually had to build a modular home in order to stay on the Cape because of skyrocketing housing costs.

"I think it's a huge, growing concern," Brown said.

The median price of homes in Provincetown, where the center is located, was \$395,000 in October, according to Banker's Trust. In nearby Truro, the median price was \$425,000.

Borrelli said the affordable housing squeeze hasn't prevented the center from pursuing particular areas of study, but has hurt in attracting interns. The center has

two now, instead of the normal six.

Officials at the Marine Biological Laboratory in Woods Hole are still getting the people they want, according to spokeswoman Pamela Hinkle. But she added that the lab is not untouched by the crisis.

"We're definitely seeing a problem with young employees," she said.

Median housing costs in Falmouth and Bourne, near the lab, ran between \$175,000 and \$185,000 last October, according to Banker & Tradesman.

But post-doctoral students, particularly those with families, are feeling the pinch because they're at the low end of the wage scale, and can't commit to long-term housing because they don't know if they'll eventually get jobs at the lab, Hinkle said.

About a month ago, the lab formed a committee to focus on all housing issues.

By contrast, the prominent Woods Hole Oceanographic Institution said it has no problem hiring employees so far.

Human resources manager Kathleen LaBernz said because of its tight specialization and prestige in the field, the institution is attracting the people it wants.

RECOMMENDED ACTION

Develop a Regional Housing Plan

Develop a community housing plan for the purpose of addressing housing supply, affordability, and availability in the region.

The regional housing plan should identify regional, sub-regional, and town-specific housing supply goals and appropriate areas for housing development, in particular multi-unit development...

REGIONAL HOUSING STRATEGY

PURPOSE

Identify policies, strategies, and appropriate areas for housing development and redevelopment to address our housing supply, affordability, and availability challenges while protecting our sensitive resources

REGIONAL HOUSING STRATEGY
SUBREGIONAL WORKING GROUPS

DEFINING SUCCESS

What's your vision for housing on the Cape and how can this plan help achieve that?

How would you define a successful regional housing strategy?

REGIONAL HOUSING STRATEGY
SUBREGIONAL WORKING GROUPS

What are the most important considerations for housing development?

e.g., design and aesthetics, affordability, sustainability, infrastructure, conservation and natural resource protection

Regional Housing Strategy

TYPES OF STRATEGIES

Design

Tools and resources to streamline permitting and support context-appropriate housing development

Resident Assistance

Programs that provide monetary or other support for people seeking to buy, rent, or maintain a home

Funding Sources

Different ways of providing funding to support affordable housing construction or programs

Attainable/Workforce Housing

Strategies to support housing for people who make too much to qualify for affordable housing but not enough to affordably secure housing

Education & Partnerships

Efforts to inform communities about housing challenges and needs and bring organizations together

Regulations

Regulatory tools or changes, such as zoning changes, to foster greater affordable and attainable housing development

REGIONAL HOUSING STRATEGY
SUBREGIONAL WORKING GROUPS

STRATEGIES

*What solutions or strategies would address our
housing challenges?*

**Help us think about future housing
development and redevelopment
on the Cape.**

**Take this 10 minute survey, your voice
is important!**
